

# JUPITER 700 SERIES B $\flat$ CLARINET

The 700 Series is the new standard for the beginning clarinetist. Available in both Grenadilla Wood and ABS body materials, these instruments produce full, rich tone with exceptional intonation and playability.

## Silent Playability

The ergonomic register key offers a more comfortable thumb position, and the cork pad ensures a tighter seal.

## Upgraded Durability

Metal tenons are designed to increase the durability of the instrument by protecting against wear and tear, and to ensure easy assembly. (JCL750 Only)

## Effortlessly Mobility

The raised C/G tone hole provides a natural hand position for the left hand ring finger, which allows for easier finger movement.
