

# JFL700WD PRODIGY FLUTE

The Jupiter JFL700WD Prodigy flute is the perfect instrument for teaching young children the joys of playing music. Its unique, patented "WAVE-LINE" headjoint design alleviates the ergonomic concerns many instructors experience while teaching beginning students to play. "WAVE-LINE" technology produces a more stable instrument prompting better posture and embouchure development without the playing frustrations associated with the traditional curved headjoint. Most importantly, this special design streamlines the transition to a standard flute. This and other key features make the JFL700WD Prodigy the right choice in helping children to experience the fun of flute playing.

## Easier to Play

The stable "WAVE-LINE" design reduces the distance between embouchure hole and keys creating better instrument alignment and easier tone production.

## Sized for Success

The specially designed low D body without trill keys reduces the flute's weight encouraging children to play longer with less fatigue.

## Specifications

- Silver-plated nickel silver body
- Patented "Wave-Line" headjoint
- Power forged nickel silver keys
- Assisted fingering key cups promote better technique and hand position
- New shape C# key
- Range to low D
- Stainless steel springs
- Double skin pads
- Formed zippered case with EVA cover and shoulder strap
- Includes acrylic instrument stand and cleaning swab

## The Perfect Fit

Assisted fingering key cups help the student to play more comfortably.

## Sleek Design

A newly shaped C# key promotes more natural hand position for easier fingering.
