

# JFL700WRE FLUTE

The Jupiter JFL700WRE flute is the perfect instrument for teaching young children the joys of playing music. Its unique, patented “WAVE-LINE” headjoint design alleviates the ergonomic concerns many instructors experience while teaching beginning students to play. “WAVE-LINE” technology produces a more stable instrument prompting better posture and embouchure development without the playing frustrations associated with the traditional curved headjoint. Most importantly, this special design not only streamlines the transition to a standard flute, but also converts from an open hole to a closed hole flute. This and other key features make the JFL700WRE the right choice in helping children to experience the fun of flute playing.

## Plastic Plug Remover

Correct and easy steps to remove metal plugs and converse the flute into an open or closed hole model.

## Easier Assembly

Specially engraved alignment indicators located on the headjoint and body ensure correct assembly and optimum position placement.

## Easier to Play

The stable “Wave Line” design reduces the distance between embouchure hole and keys creating better instrument alignment and easier tone production.

## Standard Features

- Silver-plated nickel silver body
- Patented “Wave Line” headjoint
- Power forged nickel silver keys
- Split E mechanism
- Five removable metal plugs to perform as a open hole flute
- Plastic plug remover
- Engraved alignment indicators ensure proper assembly
- Range to low C
- Stainless steel springs
- Double skin pads
- Formed zippered case with EVA cover and shoulder strap
- Includes acrylic instrument stand and beaded cleaning swab

## Available Options

- Headjoint extension kit including case and bag
