

Healthy Posture

Relaxed finger positions

Shoulders remain relaxed

A fatigue-free, straight spine

The Waveline™ Design

The innovative Waveline™ design reduces the distance between the embouchure and keys which enable players to have a natural posture and maintain a straight spinal column while playing. The comfortable posture motivates the players to play a longer period of time and increases the engagement of playing the flute.

THE WAVELINE™ FLUTE

Healthy living, **Happy** playing!

The Concept

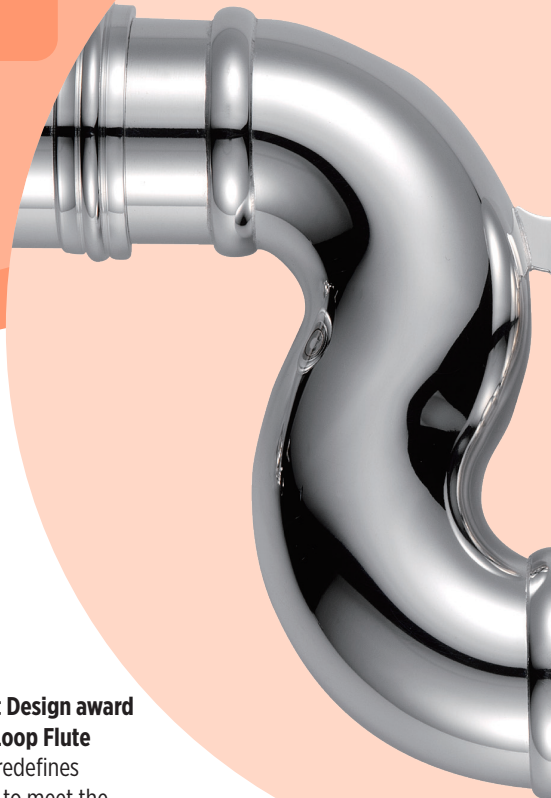

The Waveline™ Flute assists young students to play the flute with a comfortable, healthy posture and relaxed finger positions.

"As teachers, we are expected to select the perfect flute for each and every child who wishes to play this instrument!"

-Prof. Barbara Gisler-Haase, Vice Rector for Academic Affairs, Art and Young Artists' Promotion, mdw)

"We view picking out appropriately sized clothing or shoes as the most ordinary thing in the world. And it's much the same with some musical instruments – like stringed instruments. But the flute market had never offered fully fledged instruments appropriate for differently sized players – which is why I created the Waveline™ Flute."

-Mr. Werner Tomasi, Innovator of The Waveline™ Flute

**Recipient of the 2013 Red Dot Design award
for the Jupiter Waveline™ D-Loop Flute**

"The JUPITER D-Loop's shape redefines the traditional look of the flute to meet the ergonomic requirements of smaller players, like children." - The JURY

**reddot design award
honourable mention 2013**

Educator Recommendation

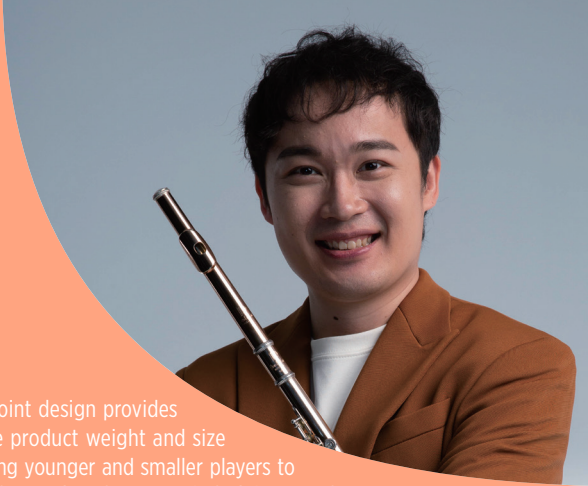

Hui-Hsuan Chen

Although the Waveline™ flute is made with same materials, has same keys and produces intonation as that of the regular flutes, the Waveline™ flute's relatively short length means that its user is less likely to experience spinal pain and muscle ache during a performance. This unique design also means that children can play the Waveline™ flute in a relaxed posture and they are thus more motivated to learn flutes and focus more on other important aspects of the music lesson like proper breathing technique, posture and finger position. Moreover, it is easy for a child to make the transition from the Waveline™ flute to a regular flute as both models are designed to be held at same level.

Yu-Tai Cheng

The unique headjoint design provides significantly more product weight and size reductions, allowing younger and smaller players to hold the flutes with ease for a longer period of time. Furthermore, the new feature of the open-hole design not only upgrades the flute's intonation but also makes the transition from the Waveline™ flute to a regular flute much easier. The Waveline™ flute is definitely the best choice for anyone who is looking for a budget-friendly and quality beginner flute.

Words from Parents

Mrs. L

My child finds it easy to play the Waveline™ flute because it is well-made, comfortable and light to hold and its sound is amazing. She is now more willing to practice her flute than before.

Mrs. I

Whereas a regular flute is too long and heavy for our child's arms and hands, the Waveline™ flute is perfect for her small figures. She feels relaxed and comfortable playing the Waveline™ flute.

The Waveline™ Flute with C footjoint

Flute Length 595.1mm.
(Usually suitable for players aged 7 and up!)

JFL700WE/WRE/WR

Easy Assembly

Specially engraved alignment indicators located on the headjoint and body ensure correct assembly and optimum position placement.

Open Hole Design

The **JFL700WRE/WR** offers the option to be either open hole or closed hole with metal plugs (plug remover included).

JFL700WD

Sized for Success

The specially designed low D body without trill keys reduces the flute's weight, allowing children to play longer with less fatigue.

Sleek Design

A newly shaped C# key promotes a more natural hand position.

The Perfect Fit

Assisted fingering key cups help students play more comfortably.

Worldwide Testimonials

Takeaki Miyamae

“The Waveline™ flute will be the new standard. For kids the design is ideal, as the ergonomic headjoint keeps the flute in line.”

-Takeaki Miyamae, MD, PhD, Flutist, the Head of International Suzuki Association, Neuroscience Researcher
2014 First Prize, Leopold Bellan International Competition, Paris, France

Walter Auer

“The ergonomic advantages of the Waveline™ Flute are evident. I, for my part, was sold by its sonic quality. I admit to being pleasantly surprised by the flute’s sound. All registers are balanced, the intonation is reliable, and the dynamic range is vast. It sounds the way you expect a flute to sound: beautiful, brilliant and effortless, with a quick response and loads of fun!”

-Walter Auer, Solo Flautist of the Vienna Philharmonic

Grows With You

The Waveline™ Flute Extension Kit offers players the option to convert their Waveline™ Flute into a straight flute. The switching process is easy and no special skills are required. The Waveline™ Flute Extension Kit also enables you to extend its period of use, letting the Waveline™ Flute grow with you! A french style case with a padded Jupiter case cover is included with the purchase of the Extension Kit.
