

1100 SERIES JTR1100 TRUMPET

DISTINGUISHED PERFORMANCE

The 1100 series trumpets address the diverse demands of the advanced musician. From commercial to classical each model is meticulously crafted to provide the highest standards for both solo and ensemble performance demands. Available in both standard and reverse leadpipe configurations and choice of bell materials, the 1100 series gives you the power to color your sound.

Power and Projection

Specially designed bells and leadpipes are created using proprietary manufacturing techniques that ensure uniform thickness. Choose between the JTR1100 with yellow brass bell and reverse leadpipe for a brighter sound or the JTR1110R with rose brass bell and standard leadpipe for a warmer sound.

Built for Dependability

Enhanced bracing throughout the instrument transmits increased resonance and added strength for improved alignment and greater durability.

Consistent Quality

Stress-free assembly processes ensure that the end result is an instrument that produces a commanding tone with defined clarity and intonation perfect for the most demanding repertoire.

Comfort and Playability

The thumb hook and fixed third valve finger ring are ergonomically positioned to give the player greater comfort and smoother action.
